

# Towards 6G

- The Internet of Senses
- Connected intelligent machines
- Digitalized & programmable physical world
- Sustainable world
- Non-limiting connectivity
- Trustworthy systems
- Cognitive network
- Network compute fabric

Dr Mikael Prytz, Ericsson

6G Wireless Summit 2020

Recorded presentation

# Towards 6G

5G

The Internet of Senses

Connected intelligent machines

Digitalized & programmable physical world

Sustainable world

Non-limiting connectivity

Trustworthy systems

Cognitive network

Network compute fabric

# 2019: 5G took off

**13M**  
subscriptions

High-end smartphones and pocket routers; ~USD 1,000

Coverage in major cities and highly populated areas by early movers

Smartphone-driven use cases

Non-standalone 5G; in one band

# 2020: 5G to scale up

**13M**  
subscriptions

High-end smartphones and pocket routers; ~USD 1,000

Coverage in major cities and highly populated areas by early movers

Smartphone-driven use cases

Non-standalone 5G; in one band

**100M**  
Subscriptions\*

Volume devices, mid-tier smartphones <USD 300

Wide 5G coverage by early movers; 20-25% operators\* to launch 5G

Consumer service bundling; trials continue for industries

Standalone 5G introduced; 5G in multiple bands

\* Ericsson Mobility Report Nov 2019

\* Ericsson analysis

# First with commercial 5G live networks in 4 continents

26 Live networks

81 commercial 5G agreements

\*As of March 2020

# 5G for business: ADAS

# Towards 6G

The Internet of Senses

Connected intelligent machines

Digitalized & programmable physical world

Sustainable world

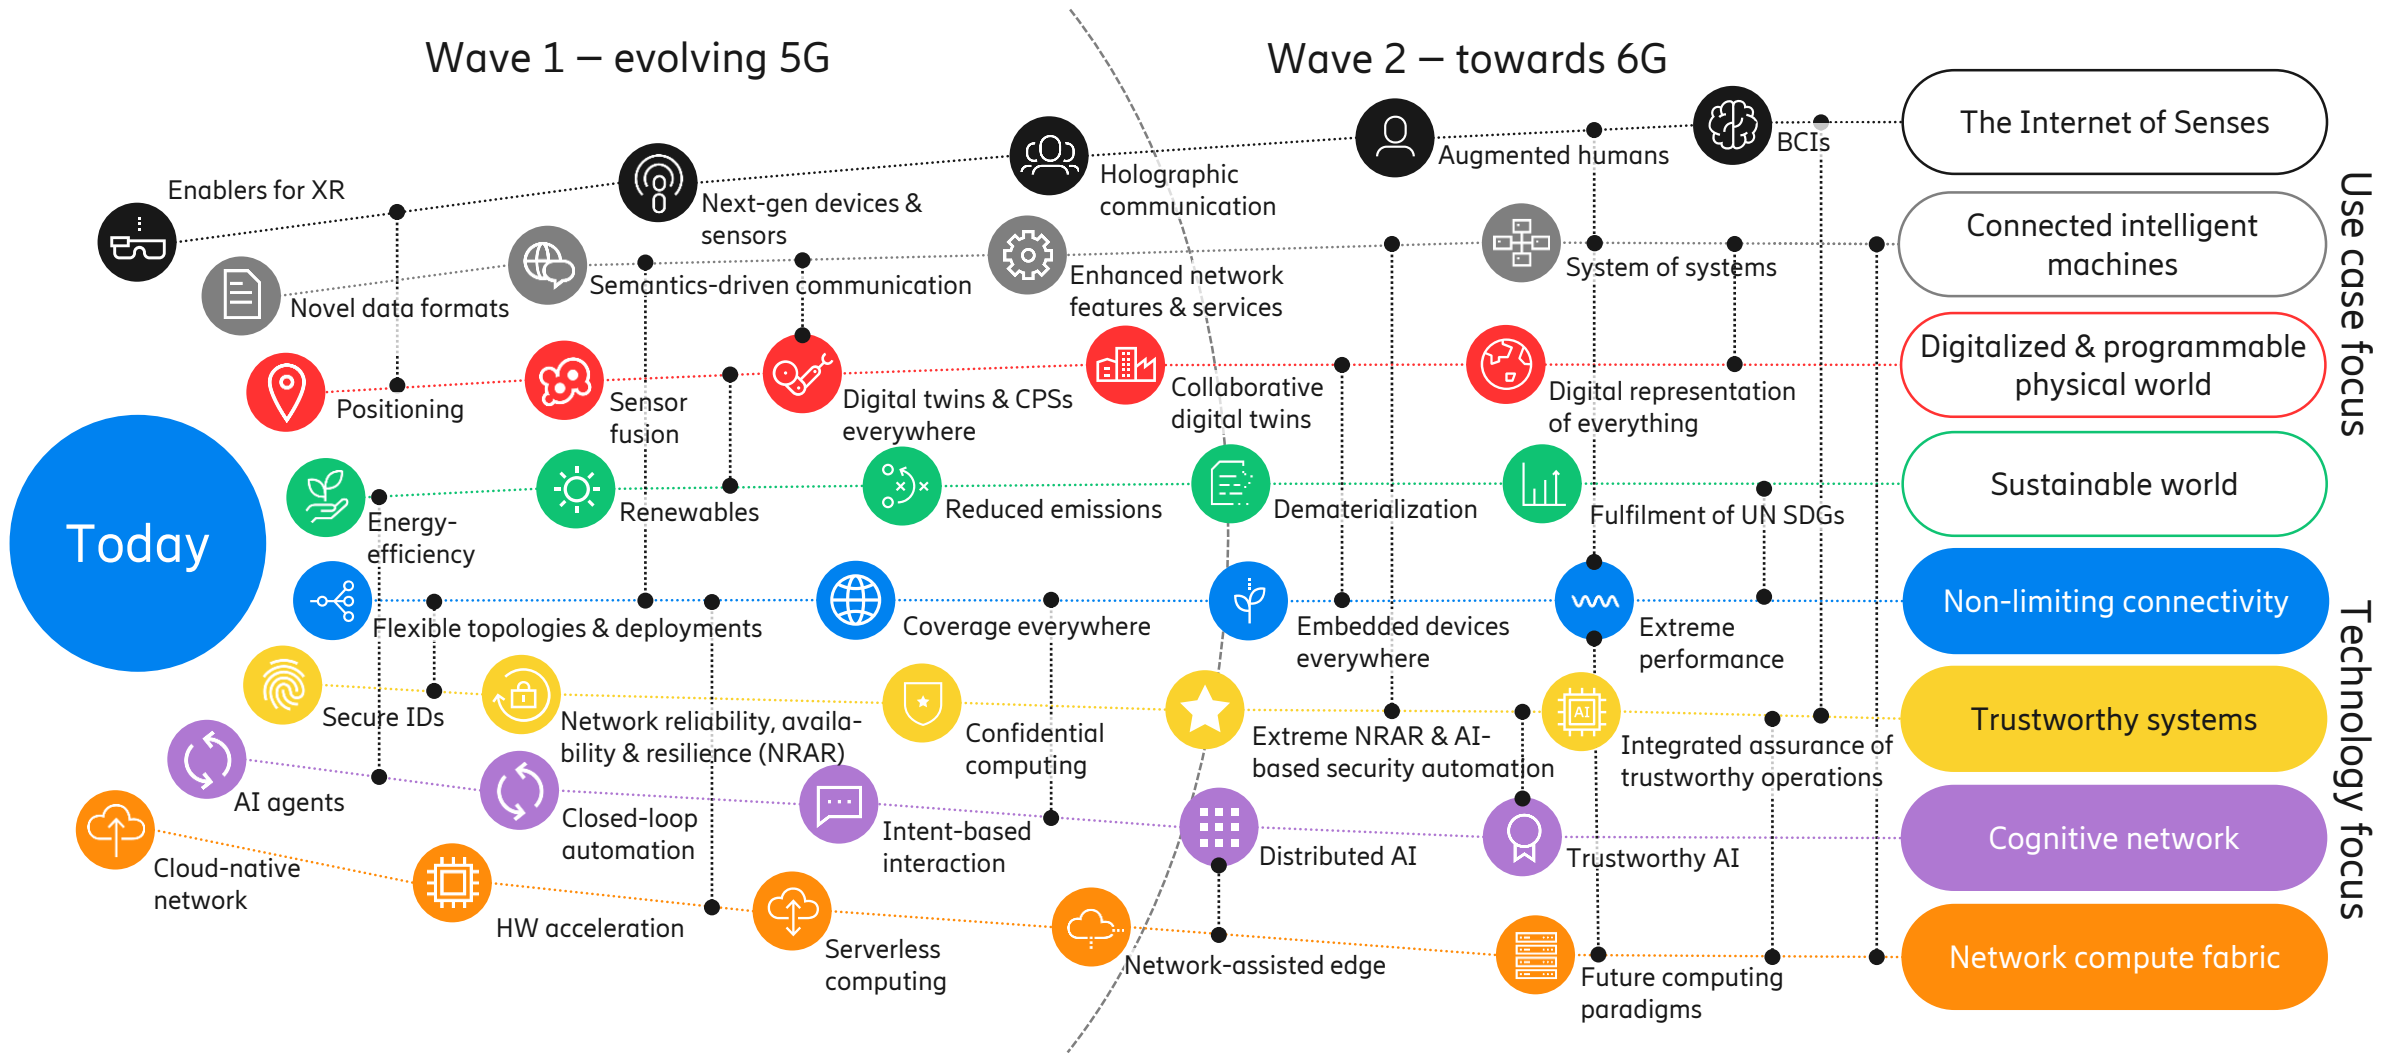

Non-limiting connectivity

Trustworthy systems

Cognitive network

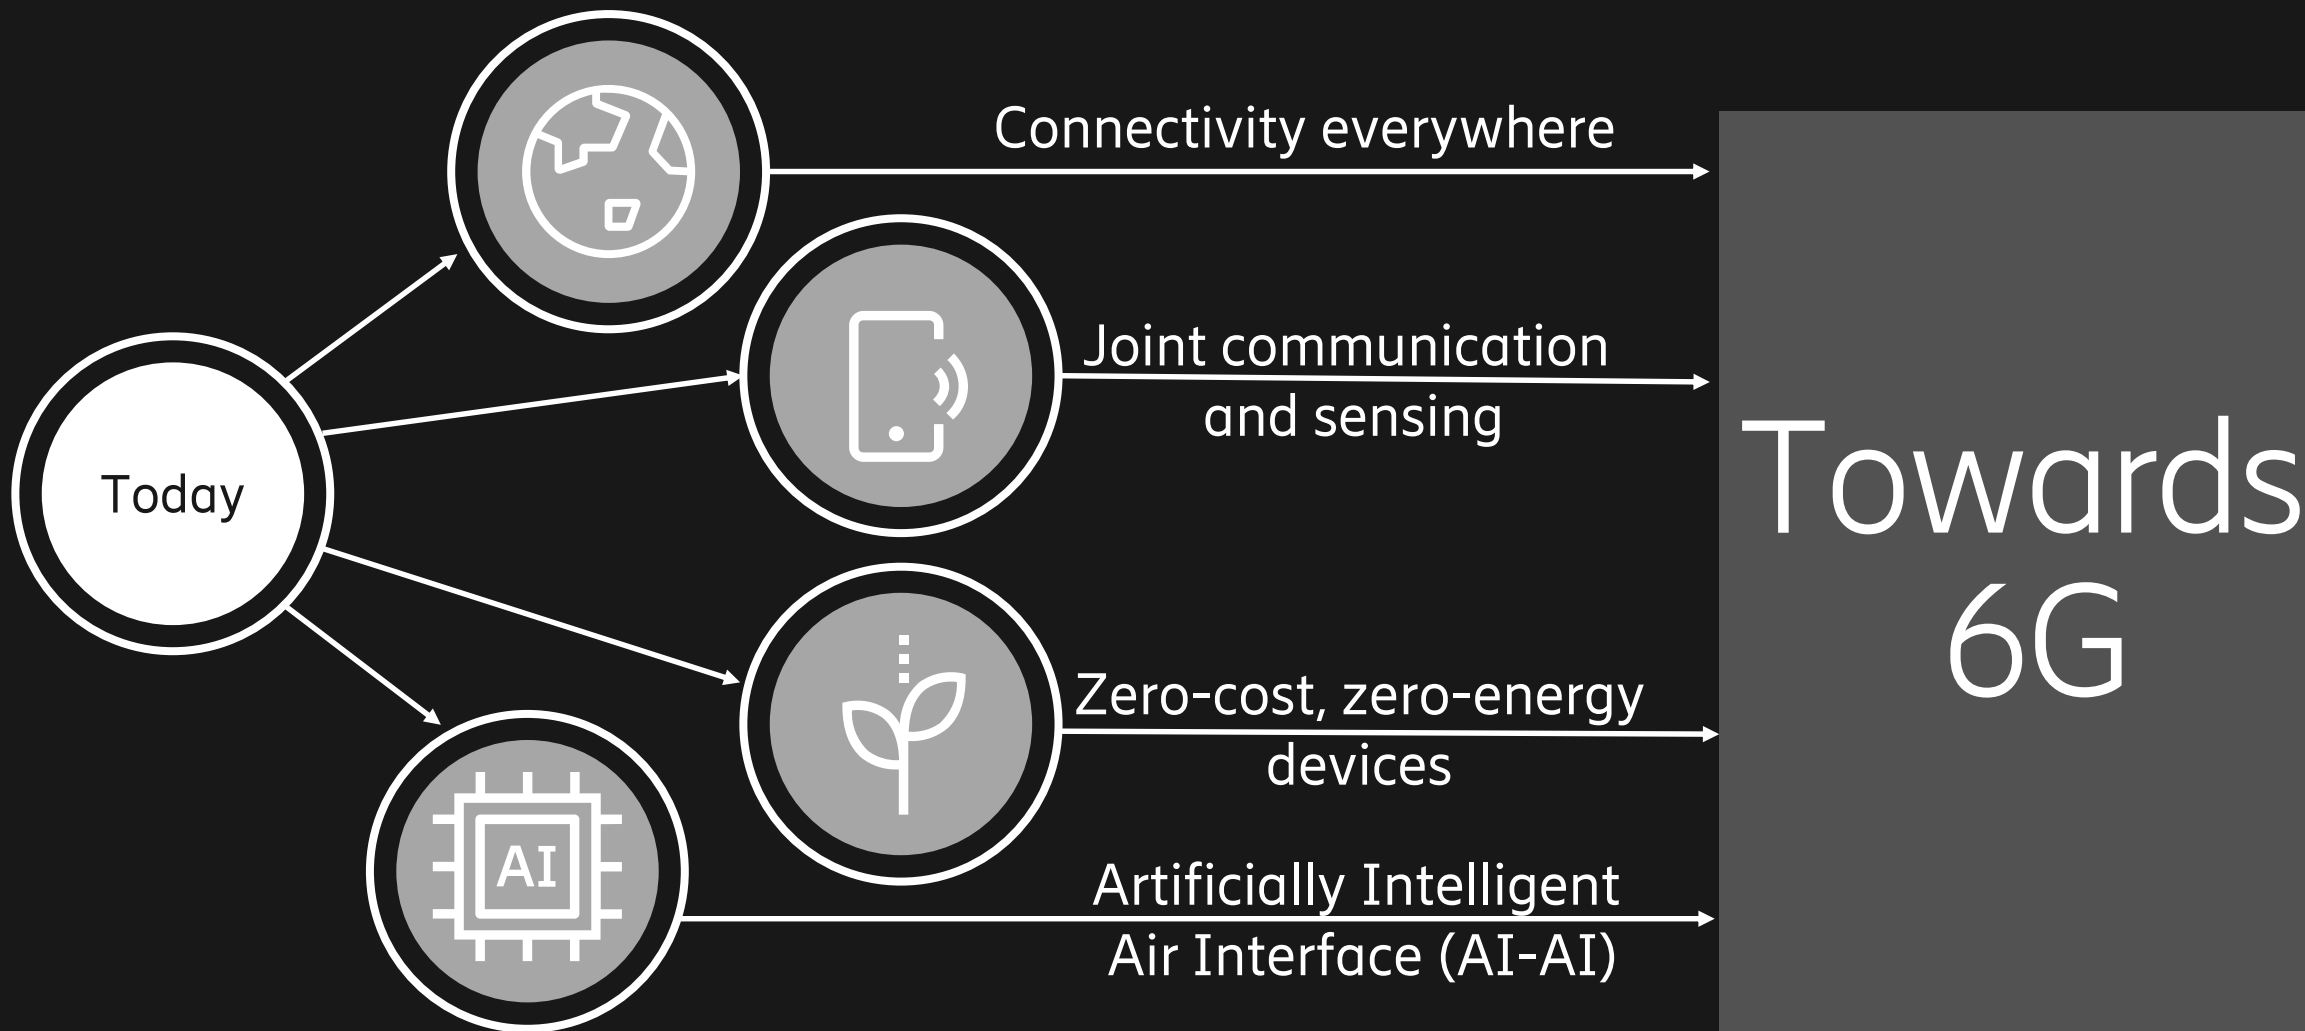

Network compute fabric

# Technology journeys

# Non-limiting connectivity

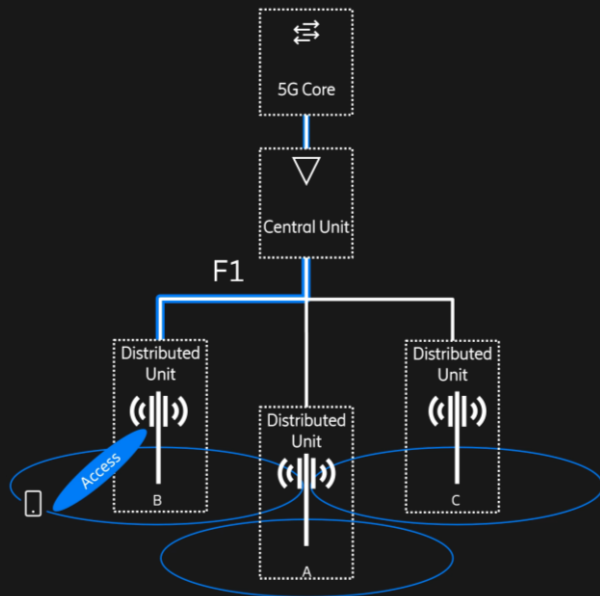

# Connectivity everywhere

## Today

Dual Connectivity  
Split RAN architecture  
Integrated access and backhaul  
(IAB)

## Evolving 5G

New network topologies  
(e.g. multi-hop IAB)  
V2X

## Towards 6G

Connectivity everywhere

# Joint connectivity and sensing

Today

Communication up to 39 GHz

Evolving 5G

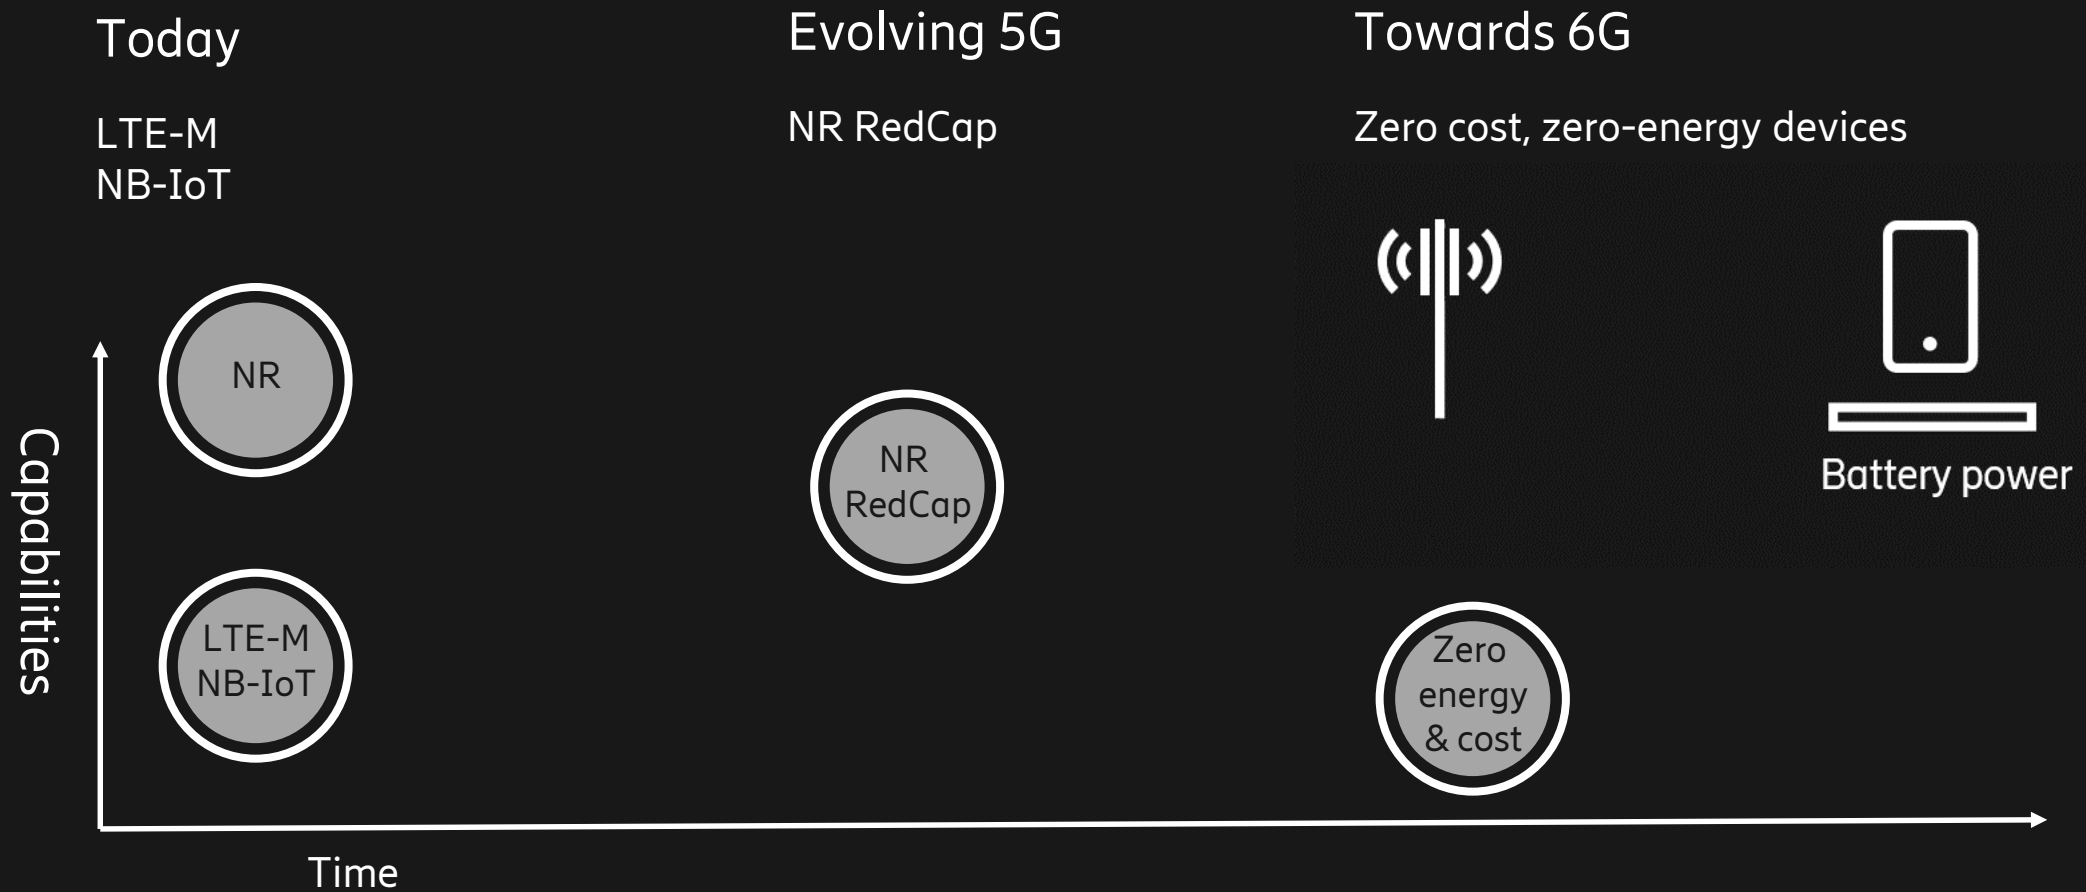

Communication up to 100 GHz  
Positioning with cm accuracy

Towards 6G

Integrated communication and sensing  
on frequencies up to 0.3 THz

# Zero cost, zero energy devices

# Artificially Intelligent Air Interface (AI-AI)

Today

Domain specific AI

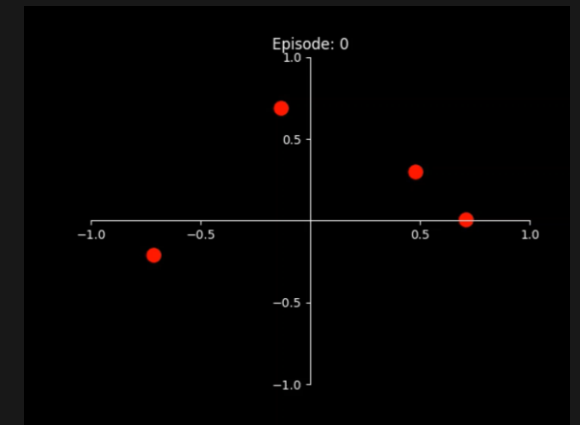

Evolving 5G

Cross domain optimization  
Zero-touch

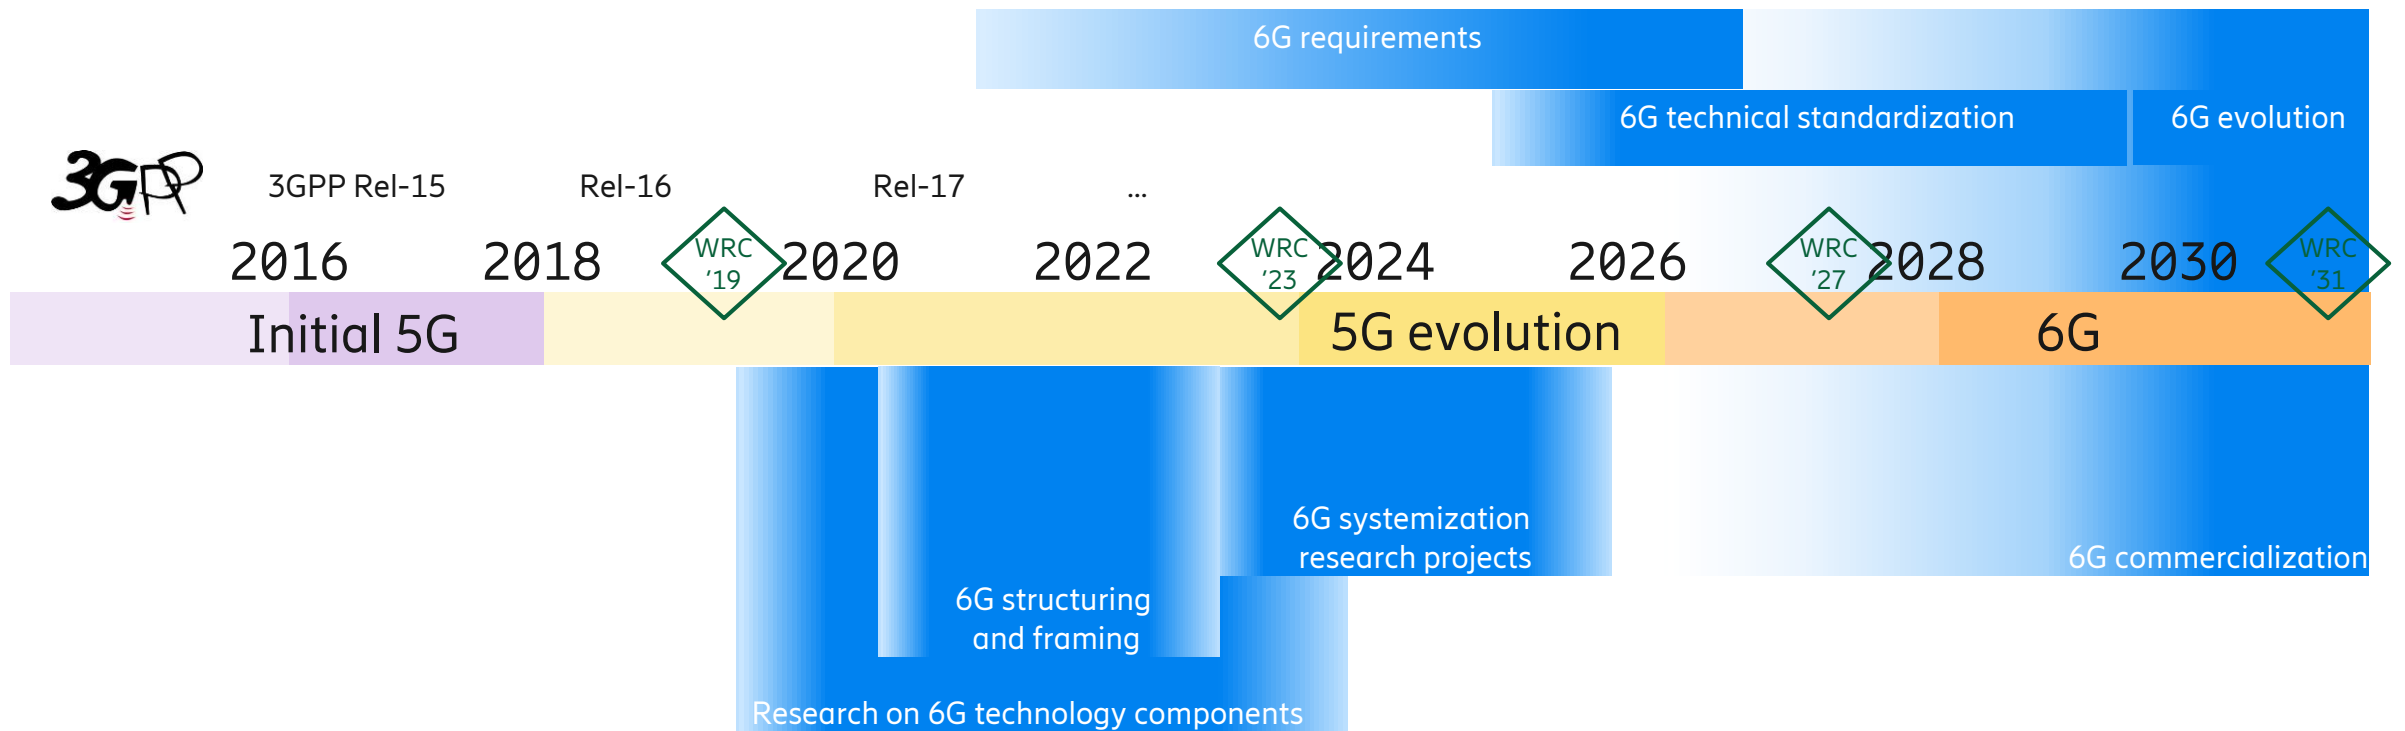

Towards 6G

Artificially intelligent air interface (AI-AI)  
with self learning transmission and reception

# Timeline

# Towards 6G

5G

The Internet of Senses

Connected intelligent machines

Digitalized & programmable physical world

Sustainable world

Non-limiting connectivity

Trustworthy systems
