

# 複製人殺手

THE COPYCAT

# KILLER

# Briefing

A dark, horror-themed illustration serves as the background. It depicts a hooded figure, possibly a killer, with a pale, bloody face and a wide, menacing grin showing teeth. The figure is wearing a dark hood and a chain around their neck. A large, blood-stained knife is held diagonally across the lower right portion of the image. The overall color palette is dark, with shades of brown, black, and red.

Greetings Special Agent.

We've got a chilling case on our hands. The CSI Department has contacted us for assistance in a particularly gruesome case: the CopyCat Killer. This deranged individual is recreating the infamous crimes of Maison, a notorious serial killer.

The TFBI has secured one of the CopyCat Killer's laptops, and they've tasked us with analyzing the web browsing history. We need to understand the CopyCat's digital footprints to track them down and prevent further atrocities.

Your Mission is to investigate the CopyCat's Chrome browser. We've provided a .zip file containing the browser's history, bookmarks, and cache files. Your mission is to extract three key pieces of information, each hidden in a different location.

Remember, the fate of innocent lives rests on your shoulders. This is not a game.

As always, Special Agent, the contract is yours, if you choose to accept.

## Materials

copycat-killer-chrome.zip

## Answer Instruction

Use the answer to unlock the flagfile, this will reward you with your badge.

Format: FLAG{solohanisgood}

## Flagfile

Be advised, the flagfile is an encrypted ZIP. Make sure your OS supports the ZIP format. Ensure the password contains no hidden characters or formatting.

## Write-Up

There is an attached file called a write-up, this will give you the answer in case you get stuck.

## Acknowledgements

This challenge was made by Joaquin Iglesias, artwork by Frank Diepmaat.
