Denmark

2004 to 2023

© Alexander Barthel

Some notes on this album text

This album text for Danish stamps from 2004 to 2023 seamlessly continues from the one covering the years 1851 to 2003. It includes definitive stamps, commemorative stamps, charity stamps ('semi-postals'), and ATM franking labels, listed chronologically together by year. The system follows the structure of European stamp catalogs such as Michel or AFA.

Definitive stamp series are grouped together for the year when the first individual stamp of the series was first issued. The two long-standing definitive designs, 'small state coat of arms' and 'numerals with wavy lines,' were reissued with new engravings in 2004 and 2005, respectively. Important characteristics of each new engraving are illustrated.

In addition to the souvenir sheets, the individual stamps contained within are also accounted for. However, se-tenants from souvenir sheets, stamp booklets, and miniature sheets, as well as the stamp booklets and miniature sheets themselves, are not included. This also applies to panes from 'Prestige' booklets, which often are designed like souvenir sheets.

For ATM franking labels, multiple fields are provided for each year and design, with the number adjustable based on individual requirements. Notably, the different sizes of denomination imprints on self-adhesive ATM labels (from 2006 onward) are not considered, depending on whether they were obtained directly from the central dispatch office or from local machines. The latter were entirely phased out in Denmark by mid-2015. These differences in denomination imprints are only illustrated in the album text.

Since late 2009, new Danish stamps are exclusively issued in self-adhesive form, hence die-cut. Exceptions are only made for individual stamps from (most) souvenir sheets and from ('prestige') stamp booklets. Differences between perforated and die-cut forms are noted and considered for stamps available in both formats.

For self-adhesive stamps, different die-cut shapes are only illustrated, depending on whether they are from coil rolls or sheets (perforation-like die-cut) or from stamp booklets (wavy die-cut). This distinction was relevant for the years 2010 through 2013.

Since 2016, all individual (self-adhesive) stamps from complete sets are printed side by side on a strip. As this is the typical form in which self-adhesive stamps are circulated in Denmark, these strip layouts are also included alongside the individual stamps.

Stamp illustrations are kept in black and white and significantly reduced in size compared to the original stamps so as not to distract from the actual stamps in the collection. These settings can be easily adjusted using the AlbumEasy program.

For stamps with an identical design and denomination differing only in color, the color is specified for easier identification in black and white representation.

This English album text is designed for letter format. Adjustments to other formats (i.e. Scott International or Speciality, MINKUS, A4 or A3) can be easily made, but this may require adjustments to the page layout as well.

This album text is free of charge and intended solely for private use and modification. The copyright remains with the author. Commercial use, even with modification, is prohibited.

The album text has been carefully prepared, with apologies for any remaining errors or instances of awkward English phrasing, as English is not the author's native language.
