Germania, Heftchenblätter 1 bis 27

Die meisten dieser Zusammenducke stammen aus Markenheftchen (d. h. aus Heftchenblättern), oder es handelt sich um Rollenmarken. Einige von ihnen - insbesondere diejenigen mit Zwischensteg oder Kehrdrucke - können allerdings nur aus Heftchenbögen stammen. Für manche Ausgaben wurden keine Heftchenbögen verfügbar gemacht, so dass in diesen Fällen keine Zwischensteg-Varianten oder Kehrdrucke vorhanden sind. Heftchenbögen und Heftchenblätter werden in diesem Albentext in Orientierung an der Michel-Systematik benannt.
