

Working Mathematically Anthem

Exploring Maths Content

Shared through Free Mathematics Centre

Introduction

This guide supports professional development based on the Cube Tube video *Working Mathematically Anthem*. To find it, from the FMC home page click *Cube Tube* and look for it in the Video Library.

The video provides visual data from classrooms using investigations to drive learning. This chart shows some of those investigations by name. There is at least one photo in the video for each of these investigations/activities. A number in brackets indicates the total number of photos for that item.

One way to begin your maths content exploration is to watch the video through looking for a photo of students about the same age as yours. Most photos will suggest which investigation is involved.

Detailed content information (and much more) about each entry is found by typing the name of the investigation into the search box in the banner of the FMC home page. There is something here for all levels from K - 10.

4 Arm Shapes	Add Town	Algebra Through Geometry (2)	Bob's Buttons
Crosses	Cube Nets	Eric The Sheep (4)	Fraction Estimation (2)
Garden Beds (4)	Growing Trisquares (3)	Heads & Legs (2)	Highest Number
Ice Cream Flavours (2)	Jumping Kangaroos	Match Triangles	Maths on a Plastic Mat
Number Tiles	Pack Up Your Bears	Picture Puzzles (2)	Racetrack
Six Plus [times version]	Smooth Edge Tiles	Sphinx	Squound
Steps (2)	Tables For 25	Ten Friends	Thirty-One (2)
	Tricubes
