Square Numbers

Show rows of consecutive odd numbers with blocks. Split this into two parts to make one square.

$$36 = 1 + 3 + 5 + 7 + 9 + 11$$

$$= 1 + 3 + 5 + (6 + 1) + (6 + 3) + (6 + 5)$$

$$= (1 + 5) + (3 + 3) + (5 + 1) + 6 + 6 + 6$$

$$= 6x6$$

Continue exploring. ... Prepare a brief report when you can explain the connection between the drawings and the equations.
