Events ... Advice from Mathematicians

- play with the problem
- collect & organise data
- discuss, make notes & diagrams
- seek & see patterns
- make & test hypotheses
- look in your strategy toolbox
- look in your skill toolbox
- check your work then look for more to learn

See sheet for strategy toolbox

Opening Ceremony

A hundred dollars a piece and
for a hundred dollars "through the hole"
there were ten dollars, pigs were two,
there were fifty cents. What did she do?

CALENDAR

MATERIALS

Two (2) black cubes
Glue and chalk

The two cubes will be used to show all the day numbers on a calendar.
You should be able to show every day in a month using one or both cubes.

2

3

2 on the upward face of one cube and a 3 on the other as shown here represents the 23rd day of a month.

Design the cubes so that each day of any month can be shown.
