Prof. Dr. N. Lobkowitz
Geschwister-Scholl Institut
Universitaet München

28 th February 1970

Dear Professor Lobkowitz,

It is indeed a real pleasure for me to recommend you my former student and presently my eminent colleague Dr. Mete Tunçay, who is willing to spend a year in your Institute.

I happen to know Dr. Tunçay since 1955 when he was one of my students. He stroke then my attention as a very intelligent young man with a critical mind, full of energy to learn what is worth to be considered as true learning. Since his graduation from the Faculty of Political Science, I followed with keen interest and a special feeling of satisfaction Dr. Tunçay's very bright and highly promising academic achievements, both as a teacher and a research scholar. I was gratified -but never surprised- to witness that his predelection did not go to the direction of obtaining easy results, but that he always took the hard, painful and -more often than not- frustrating approach of real scholarship, of true academic research and of high intellectual standards. Such an academic 'integrity', was, I believe, one of the reasons of the genuine appreciation with which were acclaimed both his Ph.D. thesis and his other works.

I am sure, Professor Lobkowitz, that if an oppartunity to work on your Institute was to be given to Dr. Tunçay, you will find in him, not only a hard working, serious and very intelligent scholar, but also a very pleasant, friendly and amiable man.

Sincerely yours,

Prof. Seha L. Meray
