We are what found signatures on below Karadeniz Ereğli Erdemir's 8016 workers.

We aren't service able our Constitution right because bosses are to take advantage to imptiness of low.

We are wholly members of Otomobil-İş. Since last 8 years. Ministry of Labour doesn't give competency to Otomobil-İş, there fore we cant signature collective Labour contract. Therefore our rights to seize.

There are two category workers in Erdemir. A and B personnel. A Personnel 2500 people. They are to take in to consideration what on competence attaching, but they dont member of trade union in the opinion the boss of Erdemir.

Today, any one trade union dont competency. All along for 8 years. In such cases single way, is referandum. Referandum is a democratic way for to us.

In this respect must be a selection (A personnel with in) This selection must made in factory, and with hidden wote, open counting, to be fixed compenty trade union.

We are honestly said that what is found signature on below, which of trade union will take competency, we will to be united to theu. The referandum isn't forbidden on constitution. Only, for apply on Judge what referandum must be to become legitimate ant it will made of application on our factory.

With our respect.
