Resolutions of the Meeting of Automobile-Labour Union held in İstanbul
on June 27, 1987 related with the problems of the workers and their
solutions

We have seen and lived the fact that the democracy is abolishing
together with the rights and the freedom of the workers as a result
of the destroying policy applied since seven years. The existance of
democracy can not be separated from the rights and the freedom of worker
The main and entire restrictions to the rights and freedom of the wor-
kers have been forwarded with the 1982 Constitution and syndicalist
regulation numbered 2821-2822.

In our country as in other developing countries the price of the
programmes of international monopolies and their finance organisations
has always been paid by workers. ANAP government who continuously back-
warded the rights and the freedom of the unions, will take their lessons
with the referendum which will be done in september. Prohibitions can
not be mentioned in democracies, therefore all the prohibitions must be
abolished in our country.

We should increase our general requirements against the policy
of ANAP government carried on with TISK and MESS which is not in favour
of workers and not suitable to the democracy. Because of this reason
the cooperation between the unions must be improved. This endeavour
must undertake also the fights against the articles in the constitution
and in other regulations limiting the rights of the workers. All efforts
must be done in order that the workers will be one body and one fist.

The aggressive policy againts the labourers is increasing
every day. We are accepting as our historical duty to find, a democrati-
cal solution to the problems of the metal workers. Our union realizes
the responsibility of our duties.

./.

We want to declare hereunder, our desires and decions, to the labourers class, public and to our members.

We must be more active in o spirit of unity and solidarity and very much cooperated in order to achieve the following.

- Abolishment of all the restrictions forwarded, with the 1982 Constitution and regulations numbered 2821-2822,
- Freedom for selecting a union, legalisation of referendum rights,
- Cancellation of lock-out right,
- Acceptance of the rights for strike and freedom of association, to make collective agreements, establishing unions for all workers,
- Cancellation of the Articles numbered 13 and 17 of the Work Law which abolishes the right of working and freedom of association,
- Establishing of unemployment insurance,
- Gaining the rights of general strike, solidarity strike, warning strike, right strikes,
- Establishment of 1 st May as the workers fiest and make changes in the law in accordance with this,
- Social guarantee of all the workers,
- A new and democratical tax system for workers, officers and all employers,
- Increaseement of the minimum wages,
- Obtain the same social quarantess for women workers with facilities of kindergarden,
- Making the Social Insurance Association more democratic, control of corporate incomes be used in their main purposes,
- Cancellation of % 10 barrage payments applied to the unions,
- Abolishment of government control on the unions, only the control of union corporates,
- Abolishment of 10 years working obligation for the union administrators

This is a struggle of classes against the ANAP government and investors in order to realise these items and put them in action.

FORWARD for democracy and rights and freedom of workers.

Long live the solidarity of workers,

Long live Otomobil-iş,
