the first time I ever saw him he was  
about 12 years old. He was a very  
handsome boy with dark hair and  
dark eyes. He had a gentle smile

hand, which I later learned  
was a toy airplane. He was  
talking to someone off-camera,

were saying. The scene was  
very peaceful and serene.

regarding these findings has  
a potential for the future  
use of this technique for eval-

types of physical activity on  
the heart rate variability. The  
present study was limited by  
the small number of subjects  
and the short duration of the  
activity. Future studies should  
explore the effect of different  
types of physical activity on  
HRV in children and adolescents  
with different levels of fitness.
